SLAMIS

SSN-LIN Automated Management & Integrating System

OBJECTIVES

- General Overview
- Research LIN or NSN
- Add LIN/NSN to PBUS-E
- Request Process

What is SLAMIS?

- SLAMIS is a web-based Army program designed to combine the nonstandard LIN process for all Army units whether Active or Reserve Component.
- SLAMIS has been implemented to give the Army Logistical community a better way to track the location of assets.

What's New

June 21, 2006

Note: Do not submit duplicate add requests for the same item. This will not result in expediting your request. Duplicate requests for the same item result in an increase of the overall processing time for all requests. Duplicate requests may also result in duplications within the NSLIN Master Catalog.

June 6, 2006

Effective 1200 EDT on 7 June 2006, the SLAMIS HelpDesk will implement HelpDesk software to manage and track your requests for assistance that come in through email or phone. When you send an email to SLAMISHelpDesk@calibresys.com, you will receive an automated response with a ticket number for reference. Our goal is to respond to assistance requests within 24-48 hours upon receipt if the email is received during normal business hours (Monday-Friday, 0800-1700 ET). If your request is submitted on a non-business day or after normal business hours, you will receive your automated response with a ticket number. You will receive a response within 24-48 hours following the next normal business day(s). We request your patience over the next two-three weeks as the HelpDesk software is implemented to work out issues.

May 23, 2006

As you noticed when logging on, SLAMIS is moving under https. On a temporary basis you will be automatically redirected from the http address to the https address. Please change your bookmark to reflect the change.

March 18, 2006

The module for requesting Changes to the Non Standard Line Item Number (NSLIN) Catalog is now available for Army-wide use. Property Book Officers (PBOs) having SLAMIS privileges and Army Research Cells may submit change requests for NSLIN records. Changes to NSLIN MCN/NIIN links, NSLIN nomenclatures, and other NSLIN related data elements may be submitted for approval to update the NSLIN Master Catalog. Please allow time for Research Cell processing of needed NSLIN changes dependent upon type of user entered criteria and rationale. Users are encouraged to examine the sample NSLIN step-by-step change request and processing procedures found under the use cases section within SLAMIS Help located on the brown bar above.

October 21, 2005

SLAMIS PBO and NCO Users may now edit/delete entries to their SLAMIS Registry they have entered to record property that is different from the NSLIN Central Catalog.
